Solar Summits Freiburg 2010: International energy experts introduce mobility of the future

Now in its third year, Solar Summits Freiburg is a series of international conferences dedicated to the topic of "Solar Mobility – Batteries, Fuel Cells and Biofuels for Sustainable Electromobility". From 13 – 15 October, leading industry experts will meet at the Concert Hall in Freiburg to discuss mobility concepts of the future.

The development of environmentally compatible and sustainable drive and vehicle concepts and their implementation on the market are one of the major challenges facing the scientific, industrial and political sectors over the next few years. This year's congress will focus on finding practical solutions for electromobility as well as alternative models and forward-looking forms of mobility at the leading international level.

Leading international industry representatives will discuss these highly explosive topics at the Concert Hall in Freiburg. They include:

- **Daryl Wilson**, CEO, Hydrogenics Corporation
- **Dr. Werner Brinker**, Chairman/CEO, EWE
- **Rolf Schumann**, CEP Better Place Germany, Better Place
- **Werner Diwald**, CEO, Enertrag
- **Dr. Christian Allmann**, Project Manager "Research Project e-Performance", Coordinator Public Funded Projects Electric/Electronic Department, Audi Electronics Venture GmbH
- **Katsuhiko Hirose**, Project General Manager, Toyota FC

Because the number of international participants is very high, the congress, which is held in English, is also a unique information and networking platform for energy

specialists from around the world. Last year, the share of foreign participants, who came from more than 25 countries, was 50 percent.

The complete congress agenda will be posted online at www.solar-summits.com, where it will be available for download, at the end of July.

About the "Solar Summits Freiburg" conference series

"Solar Summits Freiburg" is a series of international conferences organized by Messe München GmbH partnership with the Fraunhofer Institute for Solar Energy Systems ISE as well as with FWTM - Freiburg, Wirtschaft, Touristik und Messe GmbH. This new series of conferences consists of annual events that will give participants a look at the latest scientific findings and their commercial implementation and use in the sector for renewable and efficient energy use. It is an outstanding international platform for the transfer of know-how between researchers, industry representatives and politicians.
