

## **Vestas – No. 1 in Modern Energy**

The sharp rise in energy consumption calls for a sustainable modern solution that does not create more greenhouse gases, pollution or waste for future generations. Vestas has a strong business case for adding more wind to the energy mix, and is leading the way in harnessing the power of the wind and boosting locally produced energy and jobs. This is why we call wind power, modern energy.

Our sole focus is wind power and we have installed more than 39,000 wind turbines in 63 countries on five continents. We install an average of one wind turbine every three hours around the clock. By 2020, we predict that 10% of the world's electricity production will come from wind power. And at Vestas we are striving to make that number even bigger. These are some of the reasons why Vestas is No. 1 in Modern Energy

Vestas installed its first wind turbine in 1979 and has since played an active role in the fast-moving wind power industry. From being a pioneer in the industry with a staff of approximately 60 in 1987, we are today a global, market-leading group with over 20,000 people employed.

Vestas' core business comprises the development, manufacture, sale and maintenance of wind technology that uses the energy of the wind to generate electricity. Our expertise in Modern Energy covers more than just wind turbines. We specialise in planning, installation, operation and maintenance. Our competencies cover everything from site studies to service and maintenance.

### ***About Vestas Asia Pacific***

Vestas Asia Pacific is the Asia Pacific business unit of Vestas, the world leader in wind technology. Its Asia Pacific head office is located in Singapore and has sales and service offices in Korea, India, Australia, New Zealand, Japan, Taiwan and the Philippines. Vestas Asia Pacific has a cumulative installed capacity of 4,267 MW and in 2008 Vestas Asia Pacific installed 558 MW.
