Rented exhibition area	13,400 sqm
<b>Exhibitors (20 countries)</b>	<b>344</b>
Domestic	182
International	162
<b>Visitors</b>	<b>12,500</b>

## Exhibit at SITP and enter the African market

Since its foundation SITP has developed into the most interesting trade fair for the construction industry of the whole region. Continuously rising numbers in respect of exhibitors and exhibition area accompanied by growing internationality of both exhibitors and visitors prove the relevance of SITP for professionals.

### Rising exhibitor numbers at SITP

Algeria has been featuring stable economic conditions for several years. After the worldwide economic downturn in 2009, the GDP is estimated to reach 3.9% in 2010.

### Thus, SITP offers excellent opportunities for foreign companies to enter the African market:

- Algeria's construction sector obtains annual growth rates of approx. 10%. Therefore it is considered as a key industry for the country's economy.
- The major import goods are construction machinery, building material and services of engineering and consulting.
- According to new conditions for import activities, only new machinery and equipment are to be imported. A new finance law, which requires a mandatory use of documentary credit or letters of credit, provides sellers into the Algerian market with regulations increasing safety of payments.
- The government's economic promotion for the period 2010-2014 includes an investment of approx. 30 billion US\$ for infrastructure development projects:
  - Construction of 1 million residences
  - Construction of universities and educational institutions
  - Construction of 1,000 km highways
  - Investment of 10 billion US\$ for road networks
- Further infrastructure projects involve construction and modernization of airports and harbors, reconstruction of 14,000 km roads and construction of the TRANSSAHARA highway (Algiers – Lagos)

## Product Range

- Drilling, ramming and drawing equipment, sewer construction and maintenance systems
- Compressors, compressed air and hydraulic tools
- Compacting machinery for earthworks and road building
- Machinery and facilities for concrete, bitumen, waterway and railway line construction and for road repair and maintenance
- Construction vehicles
- Construction equipment and tools
- Building site facilities
- Machinery and installations for the cement, limestone, plaster, sand, clay, gravel and ballast industries
- Machinery and installations for the recycling of building materials
- Machinery and installations for the manufacture of cement, limestone and plaster bound construction elements
- Lifts elevators and escalators
- Installations, machinery and equipment for obtaining and processing stone and concrete
